1.0 Introduction

Rack Dense Chassis Solution

The integration of data and video, and voice communication in computers and the subsequent technological advances have spawn many sophisticated CTI applications that have become accessible and affordable to the small and mid-sized business. The increasing CTI applications coupled with the growing demand for corresponding hardware and systems have created a dilemma: How does one pack the growing number of equipment into existing space.

1U slim industrial monitor keyboard, the SMK, is the solution for compacting more computing power into limited space. This revolutionary monitor keyboard combines a spectacular display coupled with a keyboard with built-in pointing device in a compact unit that measures only 1U in height. Occupying a fraction of the space of traditional monitor and keyboard units, the installation of the SMK leaves ample space for other critical components. With built-in analog-to-digital conversion board, the SMK can be connected to any standard VGA graphics card for immediate on-screen display. The monitor keyboard unit has a built-in slide rail and mounts easily onto any 19" rack mount cabinet.

Instant Setup

Setting up is no hassle. SMK enables you to be up-and-running in minutes without complicated setup. Our all-in-one design has integrated keyboard, mouse, and display into a total package for your convenience.

LCD Display Information

The SMK has built-in high resolution LCD screens. With our engineering advancement, LCD can be tilted and retracted fully effortlessly. The SMK is integrated with 17" or 19" high brightness, high contrast and fast response LCD screen.

KVM Information

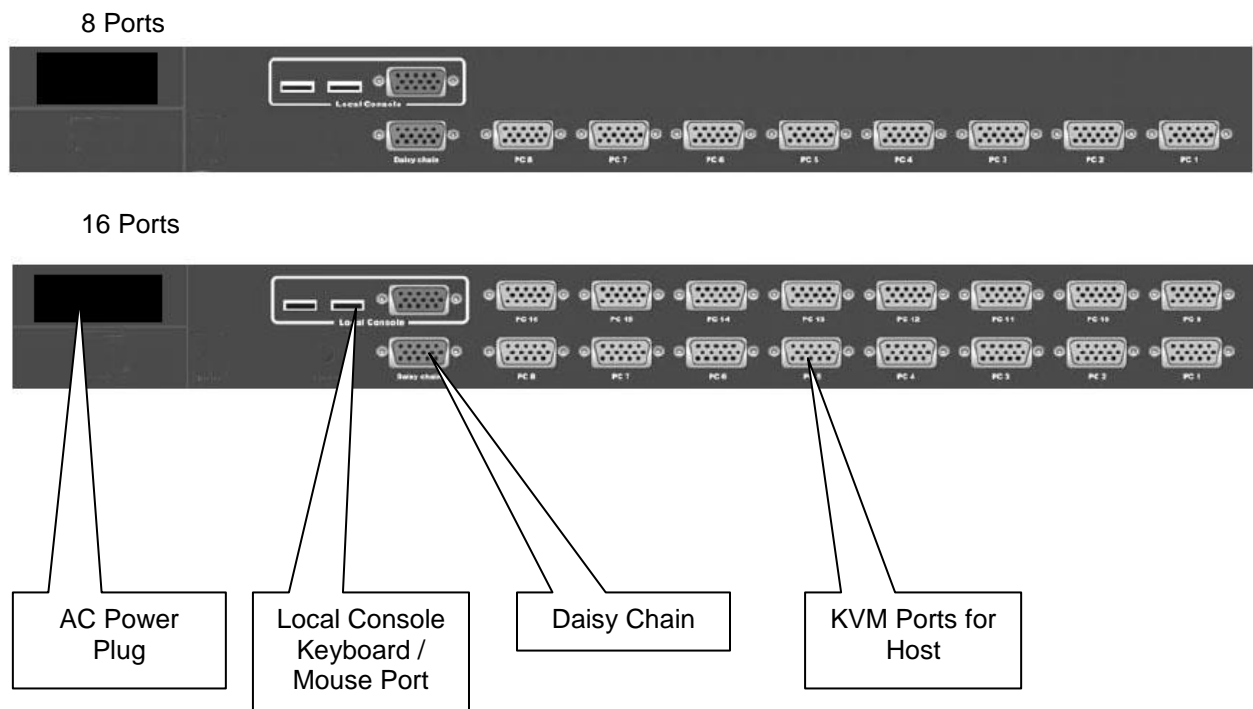

The SMK 920U is a single port USB keyboard/mouse connection [\(920P for PS/2 only\)](#) for connecting to your single server or existing KVM switch box. The SMK 980D/990D comes with built in 8 ports or 16 ports KVM switch. It supports both PS/2 and USB keyboard/mouse connection without having to deal with unwanted adapter [\(980P/990P for PS/2 only\)](#). Simple cable solution will carry the VGA signal without input device signal to help rid of unwanted mess. The KVM has integrated OSD and hot key to help control and manage the switch connecting to multiple systems to better productivity in a space saving solution.

OS Configuration

The SMK 920/980/990 will allow you to connect to multiple servers running on different platforms and operating systems. The unit has integrated extra support function key and extra mouse button to better accommodate a wider variety of needs. **Special optional upgrade to allow 117 keys and 3 mouse button for Sun system OS specific.

3.0 KVM Connection (980/990 Model Only)

3.1 The rear section of the unit will have a series of connections for connecting to systems

3.2 Connecting KVM Ports for Host using PS/2 connection. Connect single ended D-Sub end to KVM port and other end composing of VGA D-Sub, PS/2 Keyboard (Green) and PS/2 Mouse (Purple) to corresponding ports on the system.

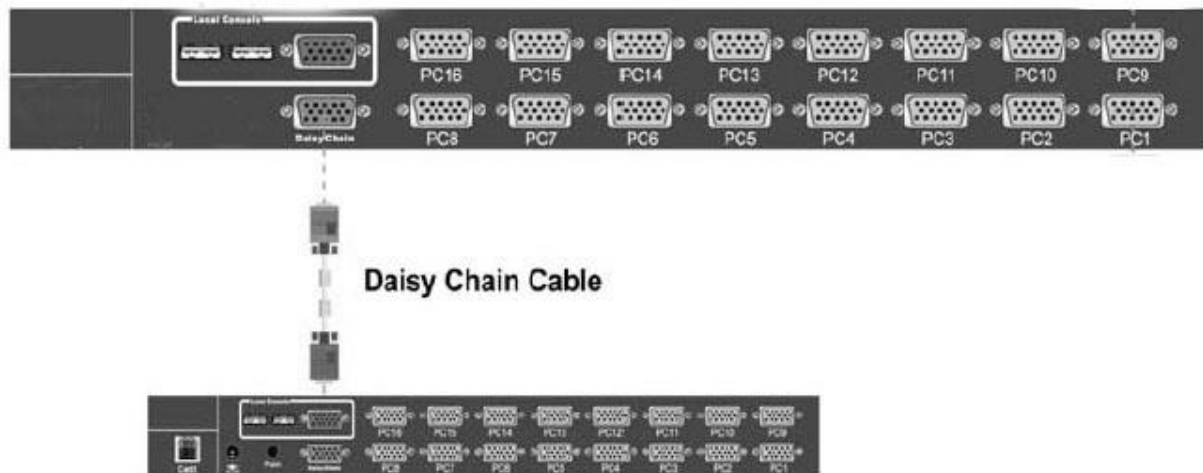

- 3.3 Connecting KVM Ports for Host using USB connection. Connect single ended D-Sub end to KVM port and other end composing of VGA D-Sub and USB to corresponding ports on the system.

- 3.4 You can connect a local console port to operate the KVM bypassing the built-in LCD and keyboard/touchpad through the rear local console port. Connect the VGA D-Sub connector and USB keyboard and USB mouse to the port marked. **On 980P/990P, USB is replaced with PS/2 connectors.

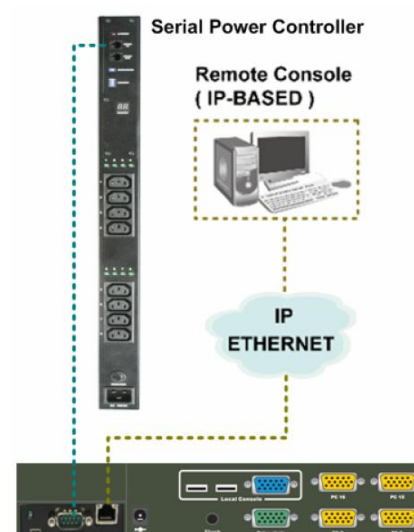

- 3.5 You can connect additional KVM port by adding additional KVM switches and connecting between them a daisy chain cable. The control will be from the primary KVM by changing banks selection.

- 3.6 **Optional CAT5 Transmitter Module Available** to connect system or remote console via CAT5 Extender for long distance connection up to 1000 feet. **Not available on 980P/990P model.

- 3.7 **Optional IP Remote Console Module Available** for allow redirect of keyboard, mouse and mouse data to a remote administration console. It allows you to control one or many computer locally at the server site or remotely via the Internet using standard browser. **Not available on 980/990P model.

4.0 KVM OSD Operations (980/990 Model Only)

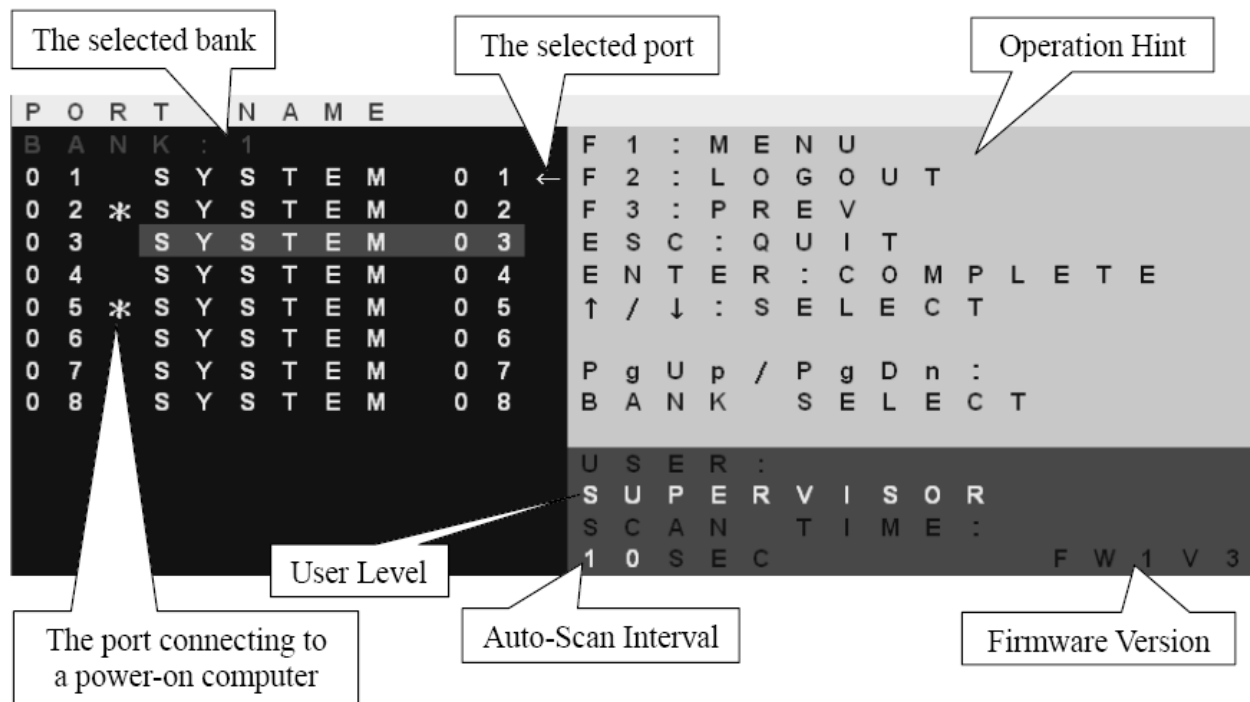

- 4.1 When powering up the unit. It is not required to provide authentication to access the KVM control for all system connected to the unit. *The PS/2 model will require the default password upon power on. The default password is 00000000.

- 4.2 After login the screen will display status of the current setting. This will give you information regarding the port (name) and key setting. Pressing any key will remove the status display. *Menu might appear differently with the PS/2 Only model.

4.4 The first page display will show the OSD menu that allows you to choose the main general options you would like to proceed. *Menu might appear differently with the PS/2 Only model.

4.5 Following are list of function key to access each of the action.

| OSD Function Key | Description |
|------------------|--|
| F1 | Go to the Main Menu |
| F2 | To log out the OSD. If Security is enabled it will show up the Login window waiting for username and password. If Security is disabled it will show up the Status window |
| F3 | Previous Menu |
| Enter | Switch to the selected port |

| 3 | Show ports 17 ~ 24 |
| 4 | Show ports 25 ~ 32 |

4.6 The bottom right portion of the OSD gives the status of the user login and setting.

USER --- There are two types of user levels: **SUPERVISOR** and **USER**. The default is **SUPERVISOR**. **SUPERVISOR** can setup and change the OSD settings at Main Menu. **USER** can only do the port switch and port search.

SCAN TIME --- This is the time interval for auto-scan function. When auto-scan function is activated, the KVM switch will auto-scan the host port one by one in the interval as setting. Notice that the port without connecting to a computer/server will be skipped over on the scan. The numeric keypad is not supported, while in OSD screen, the arrow keys, PgUp, PgDn, and Enter keys are supported.

4.7 By going into the menu, you will receive a new list of functions.
